

## Dina Martino

*Office Manager and Environmental Analyst*

Dina is the Office Manager and an Environmental Analyst at aquilogic. Her job responsibilities include many aspects of environmental and water sources consulting and general office management duties.

Dina received her Bachelor's Degree in Business Management from the University of Phoenix in 2013.

Prior to aquilogic, she was a Project Manager at Kennedy Jenks, where she was responsible for data evaluation, table and report preparation, document management, permitting, proposals, client invoicing, project oversight, and budget management.

Dina has over 12 years of consulting experience that includes a variety of positions in administrative, accounting, project management, and technical field support on a full range of environmental services. She also has experience supporting field activities such as contractor oversight and reporting, contractor negotiations, soil sampling, soil vapor sampling, groundwater sampling, storm water sampling, groundwater well installation and development, field surveying services, routine site inspections, equipment troubleshooting, and project site supervisor.

At **aquilogic**, she is currently managing the human resource and office management activities, as well as providing project support.
